Professional Summary

DevOps Engineer with 3.8+ years of experience designing, automating, and operating production cloud infrastructure on AWS. Experienced in CI/CD, Docker, Amazon ECS/EKS, Infrastructure Automation, and production deployments for large-scale Government of India platforms, including DigiLocker 2.0, API Setu, and EPFO.

Technical Skills

- **Cloud:** AWS (ECS, ECR, S3, CloudFront, VPC, IAM, Lambda, Secrets, GuardDuty, Athena, WAF), Microsoft Azure
- **Containers & Orchestration:** Docker, Amazon ECS, Kubernetes
- **CI/CD & Version Control:** Jenkins, Git, GitHub, SonarQube
- **Infrastructure as Code:** AWS CloudFormation
- **Monitoring & Logging:** Amazon CloudWatch, Elasticsearch, Nagios, Uptime Kuma
- **Databases & Messaging:** Redis Cluster, RabbitMQ, MongoDB
- **Programming & Scripting:** Python, Bash, Shell Scripting
- **Security:** IAM, AWS WAF, GuardDuty, Security Hub
- **OS & Ops:** Linux, Windows, RCA, ServiceNow

Professional Experience

Digital India Corporation, MeitY

Jun 2025 – Present

DevOps Engineer - NeGD

- Manage and operate AWS production infrastructure for DigiLocker 2.0, APISetu & EPFO supporting large-scale Government of India digital platforms serving millions of users.
- Design and maintain Jenkins CI/CD pipelines integrated with SonarQube quality gates, improving deployment reliability and automating code quality validation across environments.
- Deploy and manage Dockerized microservices on Amazon ECS using ECR, task definitions, rolling deployments, and ALB.
- Configure and manage Amazon CloudFront distributions with Amazon S3 origins, cache behaviors, and cache invalidations to optimize content delivery and support secure static website hosting.
- Configure and monitor Redis Clusters for high-availability caching and reducing backend response latency.
- Deploy and manage RabbitMQ clusters for asynchronous messaging across distributed microservices.
- Implemented CloudWatch agents, alarms, and log insights for proactive monitoring and alerting.
- Right-size AWS resources and re-architect cost-heavy components, reducing monthly cloud spend by 15%.

Sagenext Infotech LLC

Aug 2024 – Jun 2025

Cloud Engineer

- Managed AWS production infrastructure across 80+ Amazon EC2 instances supporting business-critical SaaS applications.
- Automated application deployments using Jenkins, Git, Shell scripting and Docker.
- Built and managed Docker containers for application deployment across Linux environments.
- Configured infrastructure monitoring and alerting using Nagios and Amazon CloudWatch.
- Administered Linux and Windows servers, including patching, troubleshooting and performance tuning.
- Strengthened security with IAM, CyberArm, and IDS, improving system integrity.
- Troubleshot production issues, performed RCA and implemented fixes to improve platform stability.

HCL Technologies

Jan 2023 – Aug 2024

Analyst (DevOps)

Started on Savantis payroll (Jan 2023 – Jan 2024); thereafter absorbed onto HCL payroll

- Managed Azure cloud infrastructure and on-premises environments across Linux and Windows Server platforms.
- Administered Active Directory, Group Policy (GPO), and enterprise identity & access management.
- Automated operational and administrative tasks using Shell and basic Python scripting.
- Performed Linux and Windows server administration, including patching, troubleshooting, and performance tuning.
- Configured infrastructure monitoring and collaborated with cross-functional teams to improve platform reliability.
- Implemented security best practices, access controls, and vulnerability remediation across enterprise infrastructure.

Certifications

- AWS Certified Solutions Architect - Associate (In Progress)
- AWS Cloud Architect Masters - Simplilearn
- Microsoft AZ-900 Certified

Education

Bachelor of Technology – Electrical & Electronics Engineering

Krishna Institute of Engineering and Technology

2018 – 2022
