Professional Summary

DevOps Engineer with **3+ years of experience** designing, deploying, and operating scalable, secure, and highly available cloud-native systems on AWS. Strong expertise in CI/CD automation, container orchestration, cloud security and monitoring. Currently supporting national-scale platforms such as DigiLocker 2.0, APISetu, and EPFO serving millions of users.

Technical Skills

- **Cloud:** AWS (ECS, ECR, EC2, S3, VPC, IAM, Lambda, Athena, WAF, CloudWatch)
- **CI/CD:** Jenkins, SonarQube, Git, GitHub, Shell Scripting
- **Containers:** Docker, Kubernetes, AWS ECS
- **Observability:** CloudWatch, Nagios, Uptime Kuma
- **Messaging & Caching:** Redis Cluster, RabbitMQ
- **Security:** IAM, WAF, DevSecOps
- **OS & Ops:** Linux, Windows, RCA, ServiceNow

Certifications

- AWS Certified Solutions Architect – Associate (In Progress)
- Microsoft AZ-900 Certified

Professional Experience

National e-Governance Division (NeGD), MeitY

Jun 2025 – Present

DevOps Engineer — Ministry of Electronics and Information Technology, Government of India

- Owning DevOps and cloud infrastructure for DigiLocker 2.0 and API Setu platforms with nationwide scale.
- Designed and maintained Jenkins CI/CD pipelines with SonarQube quality gates, improving release stability by 30%.
- Built and operated containerized microservices on AWS ECS using ECR, task definitions, rolling deployments, and autoscaling.
- Configured Redis Cluster for high availability caching, significantly improving API latency and throughput.
- Implemented RabbitMQ for asynchronous processing to decouple services and improve system resilience.
- Deployed centralized logging using Elasticsearch and Kibana, reducing MTTR by over 40%.
- Implemented CloudWatch agents, alarms, and log insights for proactive monitoring and alerting.
- Optimized AWS resource utilization, reducing monthly cloud cost by 15%.
- Secured public APIs using AWS WAF and fine-grained IAM policies.
- Developed AWS Lambda functions for automation and event-driven workflows.

Sagenext Infotech LLC

Aug 2024 – Jun 2025

Cloud Support Engineer (Infrastructure Operations)

- Managed production cloud infrastructure across Linux and Windows environments.
- Integrated Git with Jenkins to automate build, test, and deployment of Tax Services.
- Optimized server configurations, eliminating redundant processes and saving end-users 5+ hours per week.
- Provisioned and managed 80+ EC2 instances with 99.9% uptime.
- Implemented monitoring and alerting using Nagios.
- Strengthened security with IAM, CyberArm, and IDS, improving system integrity.

HCLTech

Jan 2023 – Aug 2024

Analyst (DevOps Support) 01/2023 - 01/2024 - Worked at HCLTech on Savantis payroll, later transitioned to HCLTech payroll

- Worked as DevOps Support and Global Access Management Team, specializing in cloud access management and solutions.
- Managed Linux and Windows servers, patching, backups, and performance tuning.
- Managed user access, GPO modifications, and Active Directory permissions.
- Handled incidents, change requests, and problem management via ServiceNow.
- Created internal runbooks and knowledge base, reducing resolution time by 40%.
- Collaborated with cross-functional teams to improve platform stability.

Achievements

- Winner of hackathon for delivering a complete end-to-end production-ready solution as DevOps owner.
- Awarded by the CEO for technical ownership and successful client delivery.

Education

Bachelor of Technology – Electrical & Electronics Engineering

Krishna Institute of Engineering and Technology

2018 – 2022
