DevOps & Platform Engineer

AWS | CI/CD | Platform Reliability | Cloud Infrastructure

Core Highlights

- **DigiLocker 2.0, APISetu, EPFO** — National citizen-facing platforms serving 50M+, 100K+ daily integrations, 20M+ beneficiaries
- **CI/CD Automation** — Jenkins and SonarQube pipelines enabling consistent, quality-gated deployments across environments
- **Distributed Systems** — Redis Cluster and RabbitMQ Cluster for high-throughput caching and asynchronous messaging
- **AWS Cost Optimization** — Right-sizing and Lambda-based automation reducing monthly infra spend by approximately **15%**
- **Observability & Incident Response** — CloudWatch dashboards and incident runbooks reducing MTTR by approximately **40%**

Technical Skills

Cloud & Infrastructure: AWS (ECS, EKS, ECR, ALB, Lambda, CloudWatch, WAF, IAM, S3, VPC, EC2)

Containers & Orchestration: Docker, Kubernetes, Amazon ECS

CI/CD & Automation: Jenkins, SonarQube, Git, Shell Scripting, Python

Messaging & Caching: Redis Cluster, RabbitMQ Cluster

Monitoring & Observability: CloudWatch, Elasticsearch, Nagios, Uptime Kuma

Security: IAM, AWS WAF, Network Segmentation, DevSecOps

Operating Systems: Linux (Ubuntu, Amazon Linux), Windows Server

ITSM: ServiceNow, Incident Management, RCA, Change Management

Professional Experience

National e-Governance Division (DIC), MeitY

Jun 2025 – Present

DevOps Engineer

Ministry of Electronics and Information Technology

- Engineered and operated AWS production infrastructure (ECS, ALB, ECR, Lambda) for **DigiLocker 2.0, APISetu** - Govt of India Digital Public Infrastructure platforms serving 50M+ citizens, 100K+ daily API integrations.
- Design and maintain CI/CD pipelines with SonarQube, improving deployment reliability and reducing manual release effort.
- Deploy and manage containerized microservices on AWS ECS using ECR, task definitions, rolling deployments and ALB.
- Provision and manage AWS infra using Infrastructure as Code practices to ensure repeatable and consistent deployments.
- Configure & Monitor Redis Clusters for high-availability caching, improving performance and reducing backend response latency.
- Deploy and manage RabbitMQ clusters for asynchronous message processing and resilient inter-service communication.
- Implement centralized logging and observability using CloudWatch Logs, reducing mean time to resolution by over 40%.
- Secure production workloads using IAM policies, AWS WAF, security groups, and least-privilege access controls.
- Develop automation solutions using AWS Lambda, reducing manual operational effort and improving platform reliability.
- Optimize AWS resource utilization and infra architecture, resulting in approx 15% reduction in monthly cloud expenditure.

Sagenext

Aug 2024 – Jun 2025

Server Engineer

Cloud Infrastructure Operations

- Engineered and operated AWS production infrastructure across 80+ EC2 instances and managed services supporting business-critical SaaS platforms; maintained platform operational stability and reliability.
- Automated Jenkins-based deployment workflows and infrastructure provisioning using shell scripting; improved deployment efficiency and eliminated manual server-setup errors.
- Designed Nagios and CloudWatch monitoring architecture with intelligent alerting policies and runbooks; improved incident detection and response capability through proactive observability.
- Optimized platform reliability through systematic patch management, Linux/Windows performance tuning, and multi-region capacity planning; improved operational stability and incident handling.
- Collaborated with development and operations teams to resolve production issues and improve system reliability.

HCL Technologies

Jan 2023 – Aug 2024

Analyst (Devops Support)

01/2023 - 01/2024 - Worked at HCLTech on Savantis payroll, later transitioned to HCLTech payroll

- Operated Azure cloud and on-premise infrastructure supporting 50+ production applications across Linux and Windows Server environments; managed distributed systems for 100+ internal and external users.
- Engineered incident, change, and problem management workflows in ServiceNow ITSM platform; implemented structured runbooks, escalation automation, and RCA processes; improved MTTR and incident handling.
- Designed production monitoring strategy and infrastructure alerting policies; collaborated with security teams on access controls, annual patch cycles, and vulnerability remediation.
- Developed automation scripts (shell, basic Python) for routine infrastructure tasks; improved operational efficiency and consistency across enterprise environments.
- Managed user access, GPO modifications, and Active Directory permissions.

Government DPI Platforms

- DigiLocker 2.0** | *India's national digital public infrastructure (DPI) — digital wallet for 50M+ citizens* **MeitY**
– Engineered AWS cloud infrastructure (ECS, ALB, Lambda, RDS) supporting high-volume citizen identity verification and document access; supported national-scale platform operations.
- APISetu** | *Government API interoperability layer — enabling 100K+ daily cross-ministry data integrations* **MeitY**
– Supported infrastructure automation and operational reliability for stateless API gateway; enabled consistent availability for government data-sharing initiatives across ministries.
- EPFO Digital Services** | *Citizen benefits platform for 20M+ active pension beneficiaries* **MeitY**
– Engineered production reliability, observability, and incident response automation for large-scale citizen benefit disbursement and claims processing; supported operational stability for critical citizen services.

Certifications

Microsoft **Azure Certified** – AZ-900 | **AWS Cloud Architect Masters Certified** (Simplilearn)

Education

Krishna Institute of Engineering and Technology **2018 – 2022**
Bachelor of Technology – Electrical & Electronics Engineering

Recognition

Hackathon Winner for delivering a complete end-to-end production-ready solution as DevOps owner.
Awarded by Nand Kumarum (IAS), Joint Secretary and CEO, NeGD, for technical ownership and successful client delivery.
